Starting Page

- browser loads 'Overview.NWD'
- user clicks on hotspot, such as 'factory', then ...

Zoom to 'partialView2.NWD'

- Forge Viewer, zoom's to view of 'factory'
- partialView2.NWD model is loaded into existing Forge Viewer scene using 'multi-model'
- 'overview.NWD' can still be seen, but it appears 'ghosted' (this is optional)
- user can click '[BACK BUTTON](#)' to return back to Overview, like this....
